Financial Dashboard n8n Workflows Summary

Overview

This package contains four n8n workflow JSON files that power a financial dashboard displaying the top 100 cryptocurrencies, top 100 stocks, and financial news. These workflows fetch data from various free APIs, process it, and make it available for your frontend application.

Included Files

Workflow JSON Files

1. **crypto_workflow.json**
2. Fetches data for the top 100 cryptocurrencies using the CoinGecko API
3. Runs on a schedule (every 15 minutes by default)
4. Also provides a webhook endpoint for on-demand data retrieval
5. **stock_workflow.json**
6. Fetches data for top 100 stocks using the Alpha Vantage API
7. Processes stocks in batches to respect API rate limits
8. Runs on a schedule (every hour by default)
9. Also provides a webhook endpoint for on-demand data retrieval
10. **news_workflow.json**
11. Fetches financial news using NewsAPI with fallback to RSS feeds
12. Categorizes news articles by topic (crypto, stocks, economy, etc.)
13. Runs on a schedule (every 4 hours by default)
14. Also provides a webhook endpoint for on-demand data retrieval
15. **webhook_workflow.json**
16. Provides endpoints for receiving real-time financial data updates
17. Processes different types of data (crypto, stocks, news)

18. Stores updates in files and forwards them to your services

Documentation

1. **Financial_Dashboard_n8n_Setup_Instructions.pdf**
2. Comprehensive setup guide in PDF format
3. Includes step-by-step instructions for importing and configuring workflows
4. Covers API key setup, testing procedures, and integration options

5. Provides troubleshooting tips and customization options

6. **setup_instructions.md**

7. Markdown version of the setup instructions
8. Same content as the PDF, in editable format

Required API Keys

To use these workflows, you'll need to obtain free API keys for:

1. **Alpha Vantage** - For stock market data
2. Register at: https://www.alphavantage.co/support/#api-key

3. Free tier: 25 requests/day

4. **NewsAPI** - For financial news

5. Register at: https://newsapi.org/register

6. Free tier: 100 requests/day

7. **CoinGecko** (optional) - For cryptocurrency data

8. Works without an API key, but rate limits are higher with one
9. Register at: https://www.coingecko.com/en/api/pricing

Quick Start

1. Import the workflow JSON files into your n8n instance
2. Set up your API keys as environment variables in n8n
3. Activate the workflows
4. Test the webhook endpoints
5. Integrate with your frontend application

For detailed instructions, refer to the setup instructions PDF.

Support

If you encounter any issues or have questions about these workflows, please refer to the troubleshooting section in the setup instructions document.
